

## Who We Are

Avnan provides award-winning design, engineering and manufacturing services of customized electronic controls used in products from HVAC to building automation systems.

From concept to market launch, Avnan partners with OEMs to provide an end-to-end solution including product development, manufacturing and supply chain management.

Our engineering experts translate your vision into a viable product, while our logistics experts ensure timely delivery to meet your market demand.

## Avnan Innovation

Avnan is committed to advancing product innovation in a world where data and insights drive every decision. We design customizable diagnostic solutions that enable OEMs and technicians to stay ahead of evolving market demands while setting new standards for performance and reliability.

Examples of our customizable control and diagnostic platforms

- Heat Pump
- Fan Coil
- ERV / HRV
- Other HVAC Products

# Custom product design and manufacturing of electronic controls

## Why Choose Us

### Quality Innovative Design

We develop innovative, practical design solutions that ensure high quality performance while mitigating risks.

### Deep Expertise

With 30 years of engineering experience, we provide the engineering know-how to deliver a competitive edge.

### Trusted Partnership

Our portfolio of long-term OEM partnerships demonstrates our commitment to service excellence.

### Cost Efficiency

We leverage our global network of facilities to deliver cost-effective, optimized solutions that meet your expectations.

### Streamline

As a full-service partner, we simplify logistics by eliminating the complexity of managing multiple suppliers.

### Flexibility

We pride ourselves on our flexibility, seamlessly adapting to changing needs and evolving project requirements.

## Our Expertise

### Electronic Product Design

Providing OEMs with innovative solutions through our engineering and manufacturing expertise.

### Global Manufacturing

Providing you access to global manufacturing capabilities to minimize your costs.

### Supply Chain

End-to-end management of your manufacturing and supply chain to ensure efficient, secure delivery of your products.

### Lifecycle Management

Managing the full product lifecycle and customer journey from concept to end-of-life.

## Industries We Serve

### HVAC Controls

Customize design and manufacturing solutions for a variety of HVAC systems.

### Home Appliances

Custom control for range hoods, fans, central vacuum, and others.

### Telematics

Electronic controls for vehicle navigation, and other long-distance data transmission devices.

### Renewable Energy

Electronic components for energy efficient systems.

### Building Automation

Integration of electronic controls with building automation systems.
